Résumé du travail réalisé

A ce jour, nous avons établi les bases de notre code, c'est à dire : set up le projet, définir les couleurs principales de notre application et créer les icônes relatifs aux différentes interfaces. De plus, nous avons créé quelques unes des interfaces principales.

Fonctions réalisées

- Set up du projet (Github + Android Studio)
- Transfert des couleurs de notre maquette vers colors.xml
- Création des icônes utiles à la réalisation de l'interface
- Design et création de plusieurs interfaces (voir images ci-dessous)
